

Tune it Up, Shake it Up, or Break it Up

Leading Radical (and not-so-radical) Change

Leaders who see change as a constant, understand the underlying systems and dynamics, and remain constantly adaptive to opportunities and threats are essential to maintaining the profitability, health, and resilience of their organizations.

This program provides an introduction to the fundamental change management concepts, principles, and techniques every leader must master in today's turbulent world. This practical approach is research based and experience validated in over two decades of Ron Black's turnaround consulting practice. Learn how the experts focus limited resources on meaningful change and turn threats into opportunities. Participants will be able to:

- Describe the critical dynamics at work in change systems
- Describe the leader's role in each stage of the change lifecycle
- Identify the key success factors in a current or future change initiative
- List the measures you can take right now, to build a more resilient organization

Format

Breakout session formats in 60-90 minute versions

On-site training in 2- to 4-contact hour versions

For a related keynote format program see ***Trust Your CAPE***

For additional onsite training formats see ***Leading Meaningful Change*** and ***Putting Systems Thinking to Work***
